WORK EXPERIENCE

GK-Optical | MERN Stack E-commerce Freelance Project

Jan 2025 – Apr2025

- Developed a full-featured e-commerce website for selling sunglasses, eyewear, contact lenses, and accessories using the MERN stack.
- Built a secure admin dashboard with full CRUD capabilities for managing products, blogs, ads, and user data.
- Integrated user authentication with JWT and implemented user features like login, wishlist, cart, and order tracking.
- Integrated Razorpay payment gateway for secure and seamless transactions.
- Designed responsive UI/UX for both frontend and admin panels ensuring smooth navigation across all devices.

PROJECTS

EJS CRUD Web App (Server-Rendered)

2025 Present

Personal Full Stack Project using Node.js, Express & EJS

- Built a server-rendered app with Node.js, EJS, MongoDB, and secure user authentication.
- Added full CRUD features with form validation, sessions, and dynamic data handling.

PROJECT HIGHLIGHTS

Personal & Practice Projects

- Built a bus reservation system with multi-user support and input validation.
- Implemented full CRUD operations using React and Redux Toolkit efficiently.
- Created Todo apps using both React and vanilla JavaScript with clean UI.
- Developed a responsive news website template optimized for various screen sizes.
- Built a custom slider component with smooth transitions and nav controls.
- Cloned a modern UI design focused on clean branding and user flow.
- Designed a mobile-first restaurant website with elegant and responsive UI.
- Developed a one-page race template with scroll-based animations and effects.
